

Blockchain Applications

Blockchain + Digital Assets

Asset Securitization

Product introduction: Building multi-centered ABS management platforms that facilitate the management of the entire life cycle of underlying assets by working with variously parties and the blockchain.

➤ Credit Card Center of a Commercial Bank

We invested our efforts in building an ABS project management platform for the client. By adopting the blockchain technology, the solution effectively solves various issues in the securitization process such as inaccessible information, low operational efficiency, weak risk control capability and difficulty in pricing.

Charity

Product introduction: Solving various issues faced by traditional charity organizations, such as low credibility in donations, difficulty in monitoring the flow of funds, and the low efficiency in liquidation.

➤ Domestic Commercial Bank

We assisted in providing blockchain infrastructure based technical support for a charity product of the client. By moving the data of key steps of the charitable donation procedures to the blockchain,

the project is able to solve the problems occurred in traditional charity activities, improving the credibility of the platform, and reduce operating costs.

➤ International Commercial Bank

We assisted in providing the client with a customized blockchain solution for charity. In working with the client's charity federation, all the donation details and payment details are stored on the blockchain, to ensure that the records cannot be forged or falsified, and is totally traceable.

Blockchain + Record Traceability

Notarization of Lotteries

Product introduction: The blockchain technology supports the notary business in leveraging “technical trust endorsement” and “legal trust endorsement” to achieve “double trust”.

➤ Local Internet Notary Office

We and the client jointly developed “Fun Lottery”, a blockchain-based notarized public lottery platform, to ensure transparency, non-tampering and traceability of lottery procedures and results.

By providing technical and legal support, it improves the credibility of lotteries with notarization.
